March 2016

Dear Shaker High School Parents:

Your child or children have begun the second half of the school year. We must begin to plan for our students' program of study for the 2016-2017 school year through the course selection process. This is a very important process that requires considerable thought and investigation. The programming process and selection begins early to allow students to receive input from their teachers, counselors, supervisors and hall principals. The first step is for students to make their course selections. Your child will be contacted by his/her counselor to schedule his/her programming meeting. We recommend that students make initial course selections by April 30th so as to better finalize the needs for course offerings and staffing for the 2016-2017 school year.

The next step occurs between May 15, 2016 and June 1, 2016. During this time students and parents may review and confirm their course selections. Changes, if necessary, may be made at this time. After June 1, the Shaker High School master schedule will be formed based on the course selection requests. After June 1, course request changes will only be made under special circumstances.

The faculty and administration want to provide you and your child the best possible information to facilitate your decisions. We appreciate your involvement and support of the programming and course selection process. Our students meet success through the support of parents that challenge and anticipate academic expectations for them at Shaker High School. As questions arise, please remember to call the teacher, counselor, supervisor, or principal who may be of assistance to you.

Sincerely,

Richard W. Murphy
Principal
